Projects

EduNexes | *React.js, Node.js, MongoDB*

GitHub

Live

Developed a full-stack educational platform using React.js, Node.js, and MongoDB to provide students with a structured environment for accessing and managing educational resources. Implemented responsive interfaces, RESTful APIs, authentication, and persistent database operations across the application.

Tracer | *React.js, Node.js, MongoDB, JavaScript*

GitHub

Live

Built a full-stack web application for structured tracking and management of application data through an interactive interface. Developed reusable React components and REST APIs with Node.js and MongoDB to support persistent data management, application workflows, and responsive user interactions.

Relay | *React.js, Node.js, Express.js, MongoDB, Socket.IO*

GitHub

Live

Developed a resource-sharing platform that enables users to discover, exchange, and donate unused resources through intelligent matching and location-based discovery. Implemented real-time negotiation and messaging with Socket.IO, REST APIs, MongoDB persistence, user profiles, and map-based resource discovery.

Achievements

3-Star CodeChef Rating

Participated in **3+ hackathons**, developing and presenting software solutions under time-constrained environments.
