Summary

Artificial Intelligence & Data Science student with strong interest in full-stack web development and frontend engineering. Experienced in building scalable and responsive web applications using React, JavaScript, Tailwind CSS, and Node.js. Passionate about creating AI-powered products, improving user experience, and solving real-world problems through modern software development.

PROJECTS

Tracer

- Built a full-stack AI-powered productivity platform for tracking daily activities, behavioral patterns, and personal growth.
- Developed secure authentication workflows, protected routes, and responsive React-based user interfaces.
- Integrated Gemini AI to generate personalized insights, summaries, and productivity recommendations.
- Designed reusable frontend components and scalable UI architecture with focus on clean user experience.

Tech Stack: React, JavaScript, Tailwind CSS, Node.js, MongoDB, Gemini API

EduNexes

- Developed an AI-powered student platform with features including AI chat, notes generation, resume analysis, and task management.
- Built responsive frontend interfaces and reusable UI systems using React and Tailwind CSS.
- Integrated AI workflows for automated notes generation and resume feedback features.
- Worked on authentication systems and frontend-backend integration for seamless user experience.

Tech Stack: React, JavaScript, Tailwind CSS, Node.js, MongoDB, Gemini API

AQI Predictor

- Led frontend development for a real-time AQI monitoring and prediction platform using environmental datasets.
- Developed responsive dashboards and interactive data visualization components for AQI analysis.
- Collaborated in a team environment to optimize frontend workflows and user experience.
- Focused on performance optimization and responsive design across multiple devices.

Tech Stack: React, Python, Tailwind CSS, TensorFlow, Chart.js

Education

Vignan’s Institute of Information Technology

Bachelor of Technology in Artificial Intelligence & Data Science

2024 – 2028 (Expected) | CGPA: 8.66 / 10

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend Technologies: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Vite, React Router

Backend & Databases: Node.js, REST APIs

Tools & Platforms: Git, GitHub, Vercel, Render, VS Code, Cursor

Core Concepts: Frontend Architecture, Responsive Design, Full-Stack Development, API Integration

Achievements

- Achieved 3★ rating on CodeChef and actively practice competitive programming.
- Solved 163+ coding problems on CodeChef and 29+ problems on LeetCode focused on problem solving and programming fundamentals.
- Built and deployed multiple full-stack web applications using React, Tailwind CSS, Node.js, and AI integrations.
