B.Tech AI & Data Science Student | Frontend & Full-Stack Development Enthusiast

PROFESSIONAL SUMMARY

B.Tech student specializing in Artificial Intelligence & Data Science with interest in frontend and full-stack web development. Experienced in building responsive web applications using React.js, JavaScript, and Node.js. Interested in creating AI-powered applications, improving user experience, and building practical real-world projects through continuous learning and hands-on development.

EDUCATION

Bachelor of Technology (**B.Tech**) in Artificial Intelligence & Data Science

Vignan's Institute of Information Technology

2024 – 2028 (Expected) | CGPA: 8.66

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend Technologies: HTML5, CSS3, Tailwind CSS, React.js

Backend & Tools: Node.js, Git, GitHub, Vercel, Render, VS Code, Cursor

Currently Learning: MongoDB, Backend Development Concepts

PROJECTS

TRACER | React.js, Node.js, Tailwind CSS, Gemini API

- Built a web application for tracking daily activities, behavioral patterns, and personal productivity.
- Added authentication flow, protected routes, and AI-based insight generation features.
- Designed responsive UI components and organized frontend architecture using React.js.
- Integrated Gemini AI to generate insights and summaries based on user activity data.
- Focused on clean UI design, smooth user experience, and structured project organization.

EduNexes | React.js, Node.js, Tailwind CSS, Gemini API

- Developed an AI-powered student platform with features like AI chat, notes generation, resume analysis, and task tracking.
- Built responsive frontend pages and reusable UI components using React.js and Tailwind CSS.
- Integrated Gemini AI for generating notes and resume feedback workflows.
- Worked on authentication flow and organized frontend/backend integration.
- Deployed the project using Vercel and Render.

AQI Predictor | React.js, Python, Tailwind CSS, TensorFlow

- Built a real-time AQI monitoring and prediction platform using environmental datasets and machine learning concepts.
- Developed dashboards and data visualization components for AQI analysis.
- Worked as Frontend Lead in a team project and handled frontend development workflows.
- Designed responsive layouts and integrated real-time data visualization features.
- Focused on improving usability and frontend performance across devices.

LEADERSHIP & ACTIVITIES

- Worked as Frontend Lead in a collaborative AQI prediction project.
- Participated in 4+ hackathons related to AI and software development.
- Interested in full-stack development, AI applications, and frontend engineering.

CERTIFICATIONS

NPTEL Java Programming Certification (2025)

ACHIEVEMENTS

- Achieved 3★ rating on [CodeChef](#).
- Solved 150+ coding problems on CodeChef and 25+ problems on LeetCode.
- Built and deployed multiple web applications using modern frontend technologies and AI integrations.
